

When to Use

Site Availability: Dynamic. Pagetype Only

The Rating Report Page Type allows your users to view the ratings of all pages in a central location. These ratings are organized by the pagelet through which the rating was assigned. For instance, if a rating pagelet called “Book Review” was assigned to multiple book pages, all of the ratings for each of the book pages would be group under “Book Review” on the rating report page type. The ratings for all pages using a particular ratings pagelet can be linked to directly from the rating pagelet itself, however visiting the rating report page by browsing to it will allow you to view results for a number of ratings pagelets.

Examples of when to use

- ▶ Use with you ratings pagelets to display all the ratings for a particular group of pages.

Page Sections & Fields

Page Section	Field Name/Item	Description of usage
Properties	Items Per Page	This field allows you to define the number of rated items to be displayed on each page of the report.
Fields	Overview This section allows you to change the order, labels and visibility for the columns that are displayed in the report page. Type in the text box to rename the columns and use the active checkbox to show or hide the columns.	
	Page Title	This column cannot be moved or hidden. It displays the name of the page whose content has been rated.
	Graphical Rating	The graphical rating of the page uses the icons defined below (rating icons section) to graphically represent the rating of the page (ex: ★★☆☆☆)
	Rounded Average	The rounded average column shows the numerical rating of the page rounded to the nearest half and out of 5 (ex: 3.5/5)
	Number of Ratings	The number of ratings columns displays the number of times the page has been rated.
	Level	The level column displays the text description of the rating for a particular page. Text descriptions are defined in the Rating Scale Definitions section described below.

Page Section	Field Name/Item	Description of usage
Rating Icons	n/a	<p>Click under the Icon field to set the icon image for each of the rating states.</p> <p>Full State: Icon for showing a rating grade is achieved.</p> <p>Half State: Icon for showing a grade is half achieved (only used for showing rounded average).</p> <p>Empty State: Icon for showing a rating grade is not achieved.</p>
Rating Scale Definition	n/a	<p>Rating scale has 9 grades (one for every half grade starting at 1); define the meaning for each of them by entering the text into the text field behind each grade number.</p>

Page Tips!

- ▶ Only one Rating Reports page is needed per site. If you link to the rating report page from a rating pagelet, only the ratings for that pagelet will be displayed. Linking from a different rating pagelet will show different ratings.
